

## Marine Environmental Training Services

Blue Planet Marine (BPM) is one of the leading suppliers of marine environmental training in Australasia, having conducted more than 600 courses and trained over 3,900 personnel since 2007. With a proven track record of delivering high quality training and inductions for industry, government and non-government organisations, BPM specialises in:

- Marine Fauna Observer (MFO) inductions for vessel crew
- Specialised MFO training for pile-driving and dredging operations
- Training in marine megafauna survey protocols and research techniques
- Marine Mammal Observer (MMO) and Passive Acoustic Monitoring (PAM) training and assessment for seismic operations [group bookings only]
- General marine environmental inductions

### KNOWLEDGE AND EXPERIENCE

BPM trainers are experts in their field. All hold postgraduate qualifications in marine biology, have years of industry and academic experience, and are skilled, engaging and effective communicators. Many of our trainers have a Certificate IV in Training and Assessment, ensuring we use first class training materials, methods, delivery and assessments.

### BESPOKE COURSES AND E-LEARNING

BPM can tailor training for your project. We work closely with you to incorporate feedback at all stages of training development and delivery, and ensure ongoing evaluation and improvement through our QSE system. As experienced developers of e-learning courses we can offer you the flexibility of online or in-person training or a combination of both.

### TRAINING LOCATIONS

We can deliver in-person training courses at a location that suits you. To date we've delivered training courses throughout

Australia, as well as in New Zealand, Indonesia and Singapore. Many of our trainers have current BOSIET and HUET qualifications that allow them to deliver training on offshore platforms if required. We also offer BPM venues for training.

### HIGH QUALITY SERVICE

All participants who successfully complete a BPM course receive a certificate of attendance. Our comprehensive training records database enables us to supply you with ongoing reports of your trained personnel.

To discuss your training needs or for more information contact us today.
